

10MWh Photovoltaic Container Used in Romanian Water Plant

Hidroelectrica announced that it received the environmental permit for the first floating photovoltaic plant in Romania, a 17-ha installation to be placed on its accumulation lake of the ...

The floating photovoltaic plant will be situated in the southern part of Romania, in Olt County, on the reservoir serving the Ipotesti Hydropower Plant, which is operated by Hidroelectrica.

The floating photovoltaic plant will be located in southern Romania, in Olt County, on the reservoir serving the Ipotesti Hydropower Plant, operated by Hidroelectrica.

The floating photovoltaic power plant will be located in the southern part of Romania, in Olt County, on the reservoir that serves the Ipotesti Hydroelectric Power Plant, operated by ...

Energy group Hidroelectrica has signed the contract for its first floating photovoltaic project, Nufarul, marking a major step in Romania's renewable energy development.

This diverse portfolio of projects showcases the scalability, adaptability, and potential of solar energy in meeting Romania's energy needs. The cumulative installed capacity represents a significant step ...

Explore a comprehensive guide on agrivoltaics and floating photovoltaics in Romania. Discover regulations, projects, and opportunities. Learn more now!

The 10 MW floating solar array will be built on the Ipotesti reservoir in Olt County, southern Romania. Hidroelectrica said it will be the largest floating solar installation on a reservoir in ...

Through this initiative, Hidroelectrica reaffirms its long-term commitment to advancing renewable energy development and modernizing its generation infrastructure, in alignment with Romania's national ...

Romania's Hidroelectrica has signed a contract with Waldevar Energy for a 10 MW floating solar project billed as Europe's largest on a reservoir.
