

15kW Modular Energy Storage Unit for Field Operations in India

PQpluS is a compact, highly efficient, AC-coupled battery energy storage unit for power and energy management at commercial-, industrial-, renewable- and EV-charging sites.

Discover the latest emerging energy storage technologies in India. Learn their benefits, applications, and how they are shaping a clean energy future in 2025.

Energy Storage Systems (ESS) can be used for storing available energy from Renewable Energy and further can be used during peak hours of the day.

Standalone Energy Storage Systems (ESS) are rapidly emerging as a key market, with 6.1 gigawatts of tenders issued in the first quarter of 2025 alone, accounting for 64% of the total utility-scale energy ...

Discover modular, scalable, and ready to implement battery energy storage systems and solutions in India from your trusted energy solutions partner Aggreko.

OGO Energy systems have a modular structure. Battery energy storage systems with capacities ranging from 5.12 kWh to 25.6 kWh have been introduced by OGO Energy. The storage ...

Key features include high energy density, long cycle life, high efficiency, and modularity, which enable integration with renewable sources like solar and wind to stabilize the grid, store excess energy, and ...

Discover how 15kWh stackable lithium batteries enable scalable, safe energy storage with 80% grid reduction and 6,000+ cycles. Ideal for solar, microgrids, and industrial use.

Designed with sustainability in mind, these units are suitable for noise-sensitive locations, dramatically reducing fuel consumption and CO2 emissions during operation.

The SolaX X3-IES is a high-performance three-phase residential ESS featuring 98.5% efficiency and 15kW continuous output. With multi-mode operation (on/off-grid) and modular battery expansion (10 ...
