How do I connect a PWM controller to a solar panel?

Always connect the PWM to the batteries first, and then connect the solar afterwards. Your kit has come with one MC4 cable, this is to be cut to size for the cable from the panels to the controller and the remainder for cable from the controller to the batteries.

What is the design stress for pv-8030 adhesive?

The Allowable Design Stress for Snow Load is 40,000 Pa (0.04 MPa) for Fortasun™ PV-8030 Adhesive and Fortasun™ PV-8303 Ultra Fast Cure Sealant and 50,000 (0.05 MPa) for Fortasun™ PV-8301 Fast Cure Sealant. The Allowable Design Stress for Dead Load (DL) for Fortasun™ PV-8030 Adhesive is 7,000 Pa.

Why do PV modules need a good thickness?

Proper thickness facilitates the installation of the sealant and allows reduced sealant stress from differential thermal movement between the PV laminate and the supporting structure. The structural bite requirement is directly proportional to the wind load on the PV module and the dimensions of the module.

Is DuPont liable if I use a photovoltaic product?

Unless DuPont provides you with a specific, duly signed endorsement of fitness for use, DuPont disclaims liability for any incidental or consequential damages. Suggestions of use shall not be taken as inducements to infringe any patent. 40 years of driving our photovoltaic products forward.
