

50mw wind farm

Chinese wind turbine manufacturer Ming Yang Smart Energy is reportedly planning to debut a 50-megawatt (MW), two-headed floating wind turbine that could upend the offshore wind ...

China's Ming Yang Smart Energy has officially announced its new medium-speed, compact semi-direct drive product line, and the OceanX platform's 50 MW ultra-large floating wind ...

China's Mingyang Smart Energy has unveiled plans for what could become the world's largest floating offshore wind turbine, a 50 MW-class unit, marking another advancement in the ...

China's Mingyang Smart Energy has unveiled plans to develop a massive 50 MW floating offshore wind turbine featuring a twin-head design similar to the company's Ocean-X platform.

As the global leader in offshore wind development, a Chinese turbine manufacturer has designed a two-headed behemoth that will generate 50 megawatts on its own.

If successful, this 50 MW floating wind turbine could outpace existing European designs and reshape offshore wind economics by drastically reducing per-megawatt costs.

China's Mingyang is developing a 50MW twin-headed floating offshore wind turbine that would obliterate previous records for the most powerful machines available. Mingyang founder and ...

China's largest private wind turbine manufacturer has just announced plans to develop the world's largest floating offshore wind turbine, which could redefine the future of deep-water wind...

Mannar, Sri Lanka (ANTARA/PRNewswire)- Envision Energy, a global leader in green technology, is supporting Sri Lanka's clean energy transition as the 50MW Mannar Wind Power ...

China's Ming Yang Smart Energy Group has announced plans to develop what it claims is the world's largest floating offshore wind turbine - a twin-head, 50 MW machine that would more ...
