

BI-12 The wind power of the wireless communication base station is no longer flashing

Do I have to install four AA batteries in my WeatherLink Live to make it work? No. Batteries are not required for it to operate. However, it is highly recommended that you install batteries to prevent loss ...

If the base station is not communicating with the WLAN, check the three LEDs on the top panel. They report network and modem activity, operational status, and radio activity. The base ...

Things to remember Transmit headsets **MUST** be linked to a Single Channel Base Station. Intercom only headsets are linked to Multi Channel Base Stations. Unplug all headset charging plugs ...

The BlueBoat went into chaos mode and had to be recovered, the base station wouldn't turn on. We pulled it apart and checked all connections - all looks ok on the surface.

Even a small loss of power can affect performance, so if you start having problems, try fresh batteries. Check your manual for the correct way to install new batteries - it is important to do things in the ...

Remove the power cord and any AA or AAA batteries from the display, and press any button on it at least 25 times. Displays using coin cells can leave their batteries installed.

To initiate the reset process, locate the SENSOR button on the display. Hold it down for approximately 5 seconds. The wind sensor will then reset and begin searching for the display ...

Turn on the power to the base unit and, after a period of one second, the red LED will illuminate until contact is established with the MHT. This can take any time up to 30 seconds. When contact has ...

I want to walk you through some of the most common weather station problems people run into. Knowing what could go wrong will make it a breeze to get your station functioning properly again.

There are steps below that will assist you in getting the sensor to reconnect with the base station and in most instances will rectify the issue without any further steps needed.
