

Brussels outdoor energy storage power supply prices

How does energy pricing work in Belgium?

In practice, suppliers purchase on EPEX SPOT (Belgian day-ahead market) and other markets. This energy price can be fixed or indexed; many Belgian households had fixed contracts through 2022, but since then variable (market-based) pricing is common.

Does Belgium have a nuclear power plant?

Belgium's generation mix is evolving rapidly. In 2024, roughly 42% of domestic production came from nuclear, with renewables (wind/solar/biomass) supplying about 30%, and natural gas about 18%. However, by late 2025 four of the country's eight reactors (Doel 1-2, Tihange 1-2) will have shut down (per the old phase-out law).

Are Belgian energy prices fixed or indexed?

This energy price can be fixed or indexed; many Belgian households had fixed contracts through 2022, but since then variable (market-based) pricing is common. Wholesale prices fell sharply in 2024, bringing down tariffs - e.g. Elia reports electricity prices averaged ~28% lower in 2024 than 2023.

How does the European power exchange work?

EPEX SPOT: Today, energy is bought and sold via the online trading platform of the European Power Exchange. The main services are Day-ahead trading and intraday trading. Participants: Electricity producers, electricity suppliers, traders and industrial end-users can buy and sell electricity for tomorrow or for the day itself.
