

The company specializes in solar energy production and offers solutions that enable customers to harness on-site solar energy, which can significantly reduce electricity costs.

Hybrid solutions - such pumped storage power plants combined with wind and/or solar farms - are becoming increasingly important for the generation and storage of clean, renewable energy, as well ...

The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established joint-stock ...

Croatia is rapidly advancing its energy storage projects to support renewable integration and grid stability. This article explores the country's initiatives, challenges, and opportunities in energy storage ...

As a well-connected part of Southeast Europe's power system, with extensive interconnectors, Croatia now faces the central challenge of integrating battery storage into the grid ...

In Croatia, home energy storage systems are becoming essential as the country transitions to net billing in 2026. These systems are more than just an investment in the present -- they are a way to ensure ...

ENNA Power is engaged in the development of battery projects in Croatia and Europe. Battery energy storage systems enable energy storage and its flexible delivery based on demand.

As Croatia accelerates its renewable energy adoption, the Croatia Power Company Energy Storage Project emerges as a critical solution to balance supply fluctuations.

Summary: Croatia is rapidly adopting centralized photovoltaic (PV) energy storage systems to stabilize its renewable energy grid. This article explores the country's progress, key projects, ...

The project involves the construction of a sophisticated 60 MW battery energy storage system (BESS) combined with a virtual power plant (VPP) in Sibenik.
