

KUALA LUMPUR, Oct 16 -- Discussions are underway on alternative initiatives to encourage electric vehicle (EV) adoption following the removal of excise duty exemptions on completely built-up (CBU) ...

Malaysia is accelerating its electric vehicle (EV) adoption by offering a mix of financial, infrastructural, and policy-driven incentives to encourage both consumers and manufacturers to go electric.

Based on data provided by MyZEVA, these visualisations highlight the growth in EV adoption and the expansion of the charging station infrastructure.

This paper explores Malaysia's transition to electric vehicles (EVs) as a key component of its green structural transformation. It assesses the policies enabling this shift, the progress achieved, and the ...

By addressing these key areas, the research highlights a feasible path to boost EV adoption in Malaysia that aligns with international trends and promotes a greener future.

Our findings show a high car ownership rate of 89% among Malaysians. The majority still own traditional petrol or diesel-powered vehicles, while EV owners represent a smaller but growing ...

In a report by Technode Global, Fitch said EV sales in the country could jump 45.3% by 2023 and EV ownership could breach the 1% mark by 2024. The current EV adoption rate is at 0.3%.

Malaysia sets a goal for xEVs (including battery electric vehicle and hybrid vehicles) to make up 20 per cent of annual new vehicle sales by 2030, 50 per cent by 2040 and 80 per cent by 2050.

As Malaysia pushes toward its 20% EV sales target by 2030, the government's efforts to incentivize EV adoption and develop the necessary infrastructure are expected to drive significant ...

KUALA LUMPUR, July 9 -- The Malaysian government has made the adoption of electric vehicles among the thrusts of its National Energy Transition Roadmap (NETR). To this end, it is targeting for ...
