

# Energy storage exports 2025

Is energy storage on track for a record year in 2025?

The global energy storage sector is on track for another record year in 2025 as utility-scale projects expand into new regions. BloombergNEF (BNEF) forecasts that developers will add 94 gigawatts (247 gigawatt-hours) of battery capacity this year, a 35% increase over 2024 and the highest annual total to date (excluding pumped hydro).

How big will energy storage be in 2025?

BloombergNEF forecasts a record 94 GW (247 GWh) of utility-scale storage in 2025--a 35% rise--driven by China's storage mandates. US tariffs, policy shifts and LFP dominance will drive growth to 220 GW/972 GWh by 2035. The global energy storage sector is on track for another record year in 2025 as utility-scale projects expand into new regions.

How has China impacted the energy storage industry in 2025?

In 2025, China made a couple of major political moves affecting its energy storage sector. In late November, the Ministry of Industry and Information Technology (MIIT) pledged to accelerate the rollout of targeted policies aimed at curbing "irrational competition" in the power and battery energy storage industry.

How big will energy storage be in 2026?

Looking ahead, global installations are set to climb to 123 GW or 360 GWh in 2026, representing a 33 percent year-on-year increase. Between 2025 and 2035, cumulative energy storage installations are projected to add 1.9 TW or 6.9 TWh of new capacity, alongside 8.7 TW of new solar and 2.0 TW of new wind.

The global energy storage sector is on track for another record year in 2025 as utility-scale projects expand into new regions. BloombergNEF (BNEF) forecasts that developers will add 94 gigawatts ...

According to CNESA Datalink's global energy storage database (incomplete statistics), overseas orders exceeded 150GWh, primarily from Americas, Europe, Australia, Southeast Asia, and Middle East ...

In another record-breaking year for energy storage installations, the sector has firmly cemented its position in the global electricity market and reached new heights. From price swings and relentless ...

Why Is 2025 the Make-or-Break Year for Global Energy Storage Exports? Let's face it--the renewable energy transition won't work without efficient energy storage solutions. With solar and wind generation projected to ...

Continued expansion of intermittent renewable energy, ESG-focused investments, the growing versatility of storage technologies to provide grid and customer services, and declining costs for key ...

Briefing The global energy storage market is set for a record-breaking year in 2025, with additions projected to surge by 35% to 94 gigawatts (247 gigawatt-hours), excluding pumped hydro. This ...

# Energy storage exports 2025

30 GW Energy storage target by 2025 at a federal level. Multiple provincial targets will likely exceed this.

BNEF forecasts that global energy storage additions will reach 92 GW or 247 GWh in 2025, excluding pumped hydro. This marks a 23 percent increase in gigawatts over 2024, reflecting robust growth ...

Despite elevated geopolitical tensions and economic uncertainty, this tenth edition of the IEA's World Energy Investment shows that capital flows to the energy sector are set to rise in 2025 to USD 3.3 ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector continues to grow ...
