Will Brazil conduct the first energy storage auction?

Brazil is set to conduct the country's first-ever energy storage auction for adding batteries and storage systems to the national power grid.

Will Brazil's first electricity auction drive \$450m investment?

Brazil is set to conduct its first auction for adding batteries and storage systems to the national power grid, as reported by Reuters. The auction, to take place in June 2025, will include 300MW energy capacity purchase that could drive an estimated \$450m in investments from winning bidders, according to consultants Oliver Wyman.

Will Brazil's energy auction improve power grid reliability?

Interest in the auction has been expressed by power companies such as Portugal's EDP and Brazil's ISA Energia. The auction will enhance Brazil's power grid reliability by integrating energy storage solutions for electricity generated from renewable sources such as wind and solar. US Tariffs are shifting - will you react or anticipate?

Why does Brazil conduct solar power auctions?

Brazil typically conducts auctions to secure power capacity for periods when demand peaks but supply diminishes, such as late afternoons - a time when solar power production declines. The June 2025 auction, exclusively for batteries and storage systems, is the first time the government allows such technologies to participate.

Brazil is set to conduct its first auction for adding batteries and storage systems to the national power grid, as reported by Reuters. The auction, to take place in June 2025, will include ...

A 20-day public consultation is anticipated to open in November to define the guidelines for the auction, which aims to contract 2 GW of battery energy storage systems (BESS). The initiative ...

The Brazilian market for energy storage using batteries is expected to reach approximately R\$ 2,2 billion in 2025, more than triple the R\$ 700 million recorded in 2024, according ...

Why Brasilia Needs Advanced Energy Storage As Brazil's capital grapples with rising electricity demand and intermittent renewable energy supply, innovative storage solutions have become critical. Did you ...

INTRODUCTION Brazil's energy generation matrix is already recognized worldwide for its high share of renewables. However, the rapid expansion of solar and wind generation introduces ...

Brazil launches a 2026 energy storage auction to boost large-scale battery projects and define storage's role in its evolving power market.

Brazil launches groundbreaking storage auction in 2026, offering 18 GW pipeline and R\$10 billion investment
