

Explore Europe's 2024 solar boom, with gigawatt-scale projects in Germany, Spain, and beyond driving a historic shift in the continent's energy landscape.

Given the exponential growth in PV generation over the past years and its expected continued growth, this article examines the optimal level of battery storage required to balance this ...

A new study from the University of Surrey named solar energy the cheapest source of power, outranking other renewables such as wind, as well as coal and gas.

Solar power consists of photovoltaics (PV) and solar thermal energy in the European Union (EU). Solar power is growing in every EU country.

This analysis profiles the top 10 solar companies shaping Europe's sustainable energy future through technological innovation, large-scale project deployment, and cutting-edge solar mounting solutions.

Solar is the fastest growing energy source in the EU and is cheap, clean and flexible. The cost of solar power decreased by 90% between 2010-2023, according to the International Renewable Energy ...

The European solar market slows to 65.5 GW of new installations in 2024, marking just a 4% growth compared to 2023. Explore the challenges and future outlook for solar energy in Europe ...

Find the most up-to-date statistics about the solar photovoltaic industry in Europe

EU Solar Energy Strategy Photovoltaic Solar Power Concentrated Solar Power Solar Thermal Organisations The EU's solar energy capacity increased significantly from 164.19 GW in 2021 to 259.99 GW by 2023, with employment in the sector growing from 466,000 workers in 2021 to 648,100 by the end of 2022, representing a 39% increase. These developments are part of the REPowerEU plan, which targets over 320 GW of solar photovoltaic capacity by 2025 and near...
