

# Ev charger plug cover canada

Are EV charger plug covers waterproof?

EV Charger Plug Port Cover, Rainproof Waterproof Outdoor Electric Car Charging Port Cover, Rain Sun UV Snow All Weather Protection, Magnetic Adhesion, Fit for Steel-Bodied Electric Vehicles. For electric car owners whose garage has no space, the waterproof EV charger plug cover is a simple and effective outdoor charging solution.

What is an EV charging port cover?

All Weather Protection: For electric car owners without garage space, the EV charger port cover offers a simple and effective outdoor charging solution. It shields your charging port from rain, snow, and ice, especially during winter, saving you the hassle of cleaning up in the morning.

Does a EV charger plug cover work in winter?

It blocks rain, snow and ice, particularly preventing the charging port from getting jammed with snow and ice in winter, sparing you the pain of cleaning out in the morning. Featuring a double-sided fabric, this EV Charger plug cover's alternate side is silver, offering UV protection for the charging port during the summer.

Why do electric cars need a charger cover?

It is specially designed to prevent the charge port from being blocked by ice and snow. The other side is made of UV-resistant silver fabric, which can protect the charging port from direct sunlight and aging. This Charger Cover provides full protection for your charging port when charging your electric car outdoors or indoors.
