

German household energy storage system capacity

At the beginning of January 2025, Germany reported a total of 18.2 GWh in stationary battery storage systems. Of this, 15.8 GWh came from home storage systems, 2.8 GWh from utility-scale storage, ...

More than 2.2 million energy storage systems have now been installed in Germany, with around 526,000 new systems added in 2025 - around one quarter of the total fleet.

As of September 2024, Germany's residential battery storage capacity reached 13.5 GWh - enough to power 1.5 million households for a day . With 153,000+ systems installed quarterly, this sector accounts for 85% ...

More than 2 million single-family homes are expected to use an energy storage system by the end of 2024. This means that 15% of all single-family homes in Germany are already largely self-sufficient with their storage ...

The number of residential storage systems installed reached 1.8 million, with a total capacity of 15.4 GWh. In the commercial sector, storage capacity grew by 26%, reaching a total of 38,000 systems ...

In August 2025, Germany's residential energy storage sector saw robust growth, with new installations reaching 278 MW / 447 MWh. This represents month-over-month increases of 9.9% in power ...

The total capacity of household storage devices now has reached about 6 gigawatts, roughly equal to the capacity of Germany's pumped hydro storage installations, the association said.

Home solar power units drove a massive rise in storage capacity in Germany last year. According to preliminary numbers from the German Solar Industry Association (BSW Solar), there were 1.8 billion ...

Moreover, Germany emerged as the frontrunner in residential storage installations across Europe. A staggering 555,000 units of residential ESS were installed in Germany in 2023, equivalent to 5.0GWh of ...

How many energy storage systems are currently installed in Germany? According to current data, there are over 1.5 million energy storage systems, most of them home battery units.
