

Hamburg Flow Battery Germany

Flow batteries offer unmatched safety and environmental performance for grid-scale storage. Thanks to its water-based electrolytes and inherently stable chemistry, the system poses no ...

Dr. Klaus Müller, head of Germany's Federal Network Agency, recently quipped: "Our grid needs the flexibility of a pretzel baker and the endurance of a marathon runner. Flow batteries deliver both."

This EU-supported project is making an important contribution to Germany's and Hamburg's transition to cleaner energy sources and is helping improve air quality across the region.

To mark the start of the construction phase, leaders from Flow Batteries Europe (FBE) and the FlexBase Group met in Laufenburg, Switzerland to solidify cooperation on addressing energy security at the ...

Construction is underway on the world's largest flow battery project at a key cross-border grid hub where Germany, France and Switzerland converge. The project aims to stabilise power ...

Construction work for the world's largest flow battery started this month at the strategic critical electrical grid interconnection point on the borders of Germany, France, and Switzerland.

June 20, 2025: Construction of an 800 MW/1.6 GWh flow battery has been launched on the borders of three European countries, Flow Batteries Europe (FBE) announced on June 17.

Located at a key cross-border grid hub between Germany, France, and Switzerland, the project aims to stabilise power flows and support long-duration renewable energy. Led by FlexBase ...
