

Heliogen Ivanpah

In a striking blow to renewable energy ambitions, the Ivanpah Solar Power Facility in California's Mojave Desert will shut down in 2026 after years of unmet goals ...

One of the most ambitious solar energy projects on the planet is in trouble. The \$2.2 billion Ivanpah concentrated solar power facility in California ...

About Us At Heliogen, we are redefining low-carbon energy with cutting-edge concentrated solar technology with proven thermal energy storage. By harnessing the power of concentrated sunlight ...

"By using Heliogen's next-generation solar energy technology, industrial energy users will be able to improve their bottom line while doing their part to mitigate climate change," said Christie ...

"The Brenda SEZ is an ideal location for commercial-scale green hydrogen production due to the ample local water supply and its close proximity to potential offtake partners and key ...

Heliogen delivers a revolutionary concentrating solar energy system that aims to offer carbon-free heat, steam, power, or green hydrogen at a cost lower than fossil fuels, providing the ...

Our Mission Heliogen is on a mission to decarbonize industry by delivering advanced renewable energy systems that are more affordable than fossil fuels.

New information has emerged in the EV sector concerning Ivanpah & Heliogen: lessons from concentrated solar's decline. This development contributes to the on...

Heliogen green steam and green hydrogen solutions can provide onsite renewable energy and reduce carbon emissions for enhanced oil recovery and reboiler heat for fractional distillation.

California is shutting down its \$2.2 Billion CSP solar energy project called Ivanpah. And we wrote last week that investing in things that fail is worthwhile. One of the key scientists behind this ...

Power plant operator and co-owner NRG Energy Inc. is preparing to close down part of its Ivanpah Solar Power Plant in San Bernardino County, ...

Powered by AI and computer vision, Heliogen is focused on providing robust clean energy solutions that accelerate the transition to renewable energy, without compromising reliability, ...

The Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave

Heliogen ivanpah

Desert at the base of Clark Mountain in California, across ...

At Heliogen, we deliver cost-effective, reliable, low-carbon energy solutions, combining innovative technologies with deep industry expertise. Our tailored approach helps businesses reduce carbon ...

Heliogen aims to solve the storage challenge by taking full advantage of overgeneration on sunny days, storing heat to use at night or on cloudy days. We use cost-effective materials that sustain key ...

Ivanpah and Heliogen both tell the same story. Ambitious projects and innovative concepts are not enough when market fundamentals move against you. Ivanpah showed the limits of ...
