

How many 5G base stations are there in New Zealand

What is a 5G network in Aotearoa New Zealand?

The 5G network is more technologically advanced and implementation has begun throughout the world and here in Aotearoa New Zealand. All cellular networks use radio waves to transmit data. Like light, radio waves are a type of electromagnetic radiation. Radio waves have been used in NZ for radio since the 1920s and cell phones since the 1980s.

Does New Zealand have a 5G network?

The details of this agreement include: New Zealand's 3 mobile network operators (MNOs) each receiving 80 MHz of spectrum in the 3.5GHz band. This is sufficient radio spectrum for all three MNOs to operate nation-wide 5G networks.

How many 5G base stations are there in China?

In data collected between July 2022 and June 2024, China was reported to have had around 3.5 million 5G base stations installed across the country, with Chinese mobile operators investing heavily in 5G infrastructure. By comparison, the European Union had around 460,000 thousand base stations, while the United States had approximately 175,000.

What frequencies will 5G use in NZ?

The initial roll out of 5G in NZ will use frequencies in the same range as 4G. In the future, the network will use a higher frequency (lower wavelength waves) - known as millimetre waves. These are closer in frequency to those used for satellite communications and some vehicle radars.

The roll out of 5G has begun in Aotearoa New Zealand. Discover the latest science, evidence and frequently asked questions about 5G technology and its impacts on health and the ...
