

How to install air switch on photovoltaic panels

How do I install a solar Auto changeover switch?

1. Decide where to install your solar auto changeover switch. This will be determined by the type of electrical panel you have. The switch must be mounted a safe height above the ground, and away from any flammable materials. Ensure plenty of ventilation, too. 2. Disconnect the main power supply to your home.

What is a solar automatic transfer switch?

An automatic transfer switch,ATS,does that automatically,in your absence. Read more about the solar ATS below. A solar automatic transfer switch is a type of self-acting switch that is specifically designed for use with a solar power system. Solar ATS are typically installed so they connect to the grid,inverter,solar battery,and the load.

How do you wire a PV array?

I did the wiring in this order: 1- The junction box at the PV array, wiring from PV array to the disconnect switch on the house, the disconnect switch, the wiring from the disconnect switch to the circuit breaker panel. 2- The connection of the new PV feed in circuit breaker in the circuit breaker box, leave the breaker off once it hooked up.
