

JenaBatteries GmbH, founded in 2012 and headquartered in Jena, is an innovative company in the field of large-format energy storage systems from a battery size of 400 kWh. We ...

Jena Flow Batteries is your partner for industrial energy storage solutions. Our resource-efficient, metal-free flow batteries enable safe and sustainable energy storage, advancing Europe's energy transition.

Over the course of this testing and deployment phase, Uniper will evaluate the use of this promising battery technology at one of its sites to see how it performs in real-world conditions.

Modular metal-free redox flow battery systems with organic water-based electrolytes, scalable from 250 kW/1 MWh to several hundred MWh, offering customizable power and energy separation, 20-year ...

Jena Flow Batteries GmbH specializes in industrial energy storage solutions, primarily using metal-free redox-flow battery technology. These systems enable resource-efficient and sustainable electricity ...

This partnership aims to expedite the development of a highly competitive European battery industry. It also seeks to facilitate the execution of the Implementation Plan outlined in SET Plan Action 7, [...]

Jena Flow Batteries GmbH is a Germany-based company specializing in the development and production of scalable redox flow battery systems for industrial energy storage applications.

Jena Flow Batteries GmbH is a leading company in sustainable energy storage. We specialize in stationary battery systems based on innovative redox flow technology. Our metal-free batteries ...

They develop large-scale systems rated at 100 kW and up that compete with traditional lithium-ion, lead, and vanadium batteries. The flow system allows for safe, optimized storage as well as simple ...
