What Is The Difference Between Level 1, Level 2, and Level 3 charging?  
In North America, Level 2 EV charging stations for your home or business will range in output between 30 and 50 amps. Most electric cars on the market can charge between 32 and 48 amps. Assuming your EV can charge at 48 amps (11 kW), you can take full advantage of this charging speed by looking at home charging stations that support 48 amps. Produc...
