

Affiliations: [Key Lab of Power Electronics for Energy Conservation and Motor Drive of Hebei Province, Yanshan University, Qinhuangdao, China].

She received the B.S. and M.S. degrees in electrical engineering from Yanshan University, Qinhuangdao, China, in 2012 and 2015, respectively. Currently, she is with ABB Electrical Machines ...

(Key Laboratory of Intelligent Control and Neural Information Processing, Ministry of Education, Yanshan University, Qinhuangdao, 066004, Hebei Province, China)

?Professor of Electrical Engineering, Yanshan University? - ??Cited by 9,357?? - ?Power electronics for microgrid and smartgrid?

She is currently working toward the M.S. degree in smooth control of energy storage converter in microgrid with the School of Electrical Engineering, Yanshan University, Qinhuangdao, China.Her ...

The Microgrid Systems Laboratory is a collaborative effort to speed the transition to a more resilient, sustainable, and equitable electricity system. Microgrids are community-scaled smart energy ...

Yanshan University (YSU), co-constructed by Hebei Provincial Government, Ministry of Education, and Ministry of Industry and Information Technology, is the major university supported by Hebei...

He is currently a professor with the Department of Electrical Engineering, Yanshan University, China. His current research interests include power converters and ac drives, microgrid, and ...

Graduated with a focus on enhancing microgrid efficiency, reliability, and sustainability through advanced control technologies. My research centered on AI-driven and model-free control...

The university has established 3 research centers -- the High-pressure Science, the Nano Clean Energy, and the Special Carriage Equipment centers; 3 research institutes -- the institutes of...

Microgrid Laboratory of Yanshan University
