

Neighbors solar power generation blocks the light

State-level legislation often limits an HOA's power to restrict solar panels. Many states have "solar access laws" that protect a homeowner's right to install solar energy systems.

Installing solar panels, whether on your roof or as a ground array, is exciting, but sometimes, it can become a battle with your neighbors, especially if they weren't aware that you ...

Though these ordinances are generally located in a section of a local government's ordinances devoted to trees, and often do not contain any reference, or only a cursory reference, to solar power access ...

A solar easement restricts what your neighbor can build or grow on the property within his or her airspace, because the neighbor cannot block sunlight to your solar panels.

Your neighbor cannot plant a tree blocking the sun after your solar panels are installed. However, there are size and shading thresholds that must be met before these protections kick in. ...

In many jurisdictions, there are statewide or local solar access laws designed to prevent unreasonable obstruction of solar energy systems. These rules can limit how much a neighboring ...

If you're finding that your neighbor's new construction is blocking your sunlight, it might be time to explore some legal options. Start by consulting with a local attorney who specializes in ...

In the [r/treelaw](#) subreddit, one homeowner lamented that their neighbor "intentionally planted trees to block the sun from [their] solar system." "Is there a law against this?" the user inquired.

If an adjacent neighbor's construction increases shading on your solar energy system by five percent or more, then the neighbor must get your permission before obtaining a building permit. ...

If solar energy systems installed on your property are adversely impacting your neighbors, several steps can be taken to address the issue efficiently and amicably.
