# Open Source Uninterruptible Power Supply

WinMust is a free Windows application designed to monitor and control a compatible Mustek brand UPS (Uninterruptible Power Supply). It provides the user with status information, such as battery voltage, ...

First off, the design is open source, which of course invites tinkering and repurposing. The UPS is built for a 12 volt supply and load, but that obviously can be changed to suit your...

12V UPS with Open Source Monitoring Support The Protectli UPS is an uninterruptible power supply reimagined with an emphasis on hardware hacking. It is paired with features like a webserver, ...

To set up your system, be sure to follow this guide! This is a simple, open source uninterruptible power supply (UPS), based around an STM32F405 and written in Rust.

The primary goal of the Network UPS Tools (NUT) project is to provide support for Power Devices, such as Uninterruptible Power Supplies, Power Distribution Units, Automatic Transfer Switches, Power ...

Maker Ryan Walker, of Interrupt Labs, has teamed up with Protectli to design an open source uninterruptible power supply (UPS) -- using 12 18560 batteries to keep DC-supplied devices ticking ...

Inspired by their stories, I started this project to create an uninterruptible power supply that is straightforward, cost-effective, easy to build, and customisable to individual requirements.

Because of this, my computers, servers, and network equipment are all on relatively low-cost, uninterruptible power supplies. These all run on sealed lead acid batteries and are not an overly ...

Ryan Walker from Interrupt Labs, in collaboration with Protectli, has developed a new open-source uninterruptible power supply (UPS). This UPS, which operates on 12 18650 batteries, ...

This repository contains the design files for a DC uninterruptible power supply well suited to run network appliances like small switches, home routes and WLAN access points.
