

# Outdoor lighting solar all-in-one machine

What is integrated solar street light?

Please contact us for further details. Integrated solar street light means that the whole solar street light system is integrated into an LED street light, that is, there is a solar panel on the street light, and the street light contains batteries, controllers, microwaves, etc.

What is a two in one solar street light system?

Two in one means that the whole system includes two main parts: a street lamp head (integrates LED modules, solar controllers and batteries), and an independent solar panel. Weather dependence: Solar street lights rely on solar panels to absorb sunlight for charging.

What is the difference between two in one solar street lights?

The two in one design is more flexible and can meet the requirements of various areas and projects, but its cost is sometimes higher because it generally requires additional brackets to install the solar panels. ZGSM is the top manufacturer, factory, supplier of solar street lights in China since 2005.
