

Outdoor telecom enclosure for livestock farming in somaliland

The system can help reduce livestock losses, improve livestock management practices, and increase productivity. The system is currently being field-tested in Somalia.

It does so by examining the nomadic pastoralist practice in Somalia of cutting down bushes and trees to create livestock enclosures. It shows that the climate crisis is making this practice unsustainable.

This policy brief examines the impacts of enclosures on pastoralism in two sites: private enclosures in Balligubadle and a public enclosure in Aroori. Balligubadle in the western Hawd region relies heavily ...
