

Photovoltaic panel packaging machine is fully automatic

It consists of a six-axis robot and four pallet sorting machines up to six are optional). The robotic arm uses a special vacuum system to remove modules from the test area and store them in four or more ...

Our portfolio includes not only automatic solar panel production lines, but also individual equipment for PV modules production, from glass loading equipment at the beginning to solar panel assembly and ...

The full auto PV Module packaging line integrates auto inputting, auto flipping, auto packaging, auto corner protection, auto wrapping, and auto conveying, which solves the problems of low work ...

In this era of automation, HORAD has developed a state-of-the-art fully automatic packing line for PV modules and solar panels. This innovative solution streamlines the packaging process, ensuring ...

The system provides fully automatic pallet positioning, strapping, and tension control, ensuring reliable packaging for fragile and high-value photovoltaic modules during transport and...

It consists of a six-axis robot and four pallet sorting machines up to six are ...

Discover automatic solar panel packaging machines with CE certification, ideal for photovoltaic production lines. Trusted 2-year warranty.

The ECOPACK R is designed to revolutionize solar module handling with its fully automatic packing system. Featuring a 6-axis robot and up to six pallets for detailed sorting based on module power ...

Our company provides a turnkey solution for a fully packaged production line and equipment for solar module manufacturers.

A 100-150MW fully automatic turnkey line for single/double-glass panels. Universally compatible with all cell types (PERC to HJT), sizes (156-230mm), and busbar designs (3BB-20BB).

The Fully Automatic EVA/TPT Cutting Machine is specifically developed for solar module packaging lines. This machine enables high-speed and precise cutting of EVA (ethylene-vinyl acetate) and TPT ...
