

In this column, we summarize the transition in the mainland Kyushu region with regard to output control in the Kyushu region, which has been a hot topic from early spring to summer of 2023.

Hita Kyushu Solar PV Park is a ground-mounted solar project. The project got commissioned in April 2023. Toshiba Energy Systems and Solutions was selected to render ...

In this study, we first develop a transformer-based neural network to analyze high-resolution satellite imagery and estimate the adoption rate of rooftop photovoltaic (PV) systems in ...

Seraphim is a Tier 1 solar module manufacturer, listed by BNEF. We research, develop, produce, and sell solar PV products since 2011.

Japan's updated outlook for FY 2025 projects a rise in renewable energy output curtailment across several regions. Kyushu is expected to record the highest curtailment rate at ...

Explore the solar photovoltaic (PV) potential across 174 locations in Japan, from Shihoro to Naha. We have utilized empirical solar and meteorological data obtained from NASA's POWER API to ...

JR Kyushu announced its participation in a new business to acquire and operate small-scale solar power plants, as Japan's fixed-price buyback scheme nears its end in 2032. The joint ...

According to the statement, TESS Engineering will install a total of 22.35MWh of Huawei BESS units across the three sites and handle the solar-plus-storage assets' aggregation once they ...

To access additional data, including an interactive map of global solar farms, a downloadable dataset, and summary data, please visit the Global Solar Power Tracker on the Global ...

Choosing a solar factory location in Japan? This guide analyzes Kyushu and Tohoku, comparing costs, supply chains, and incentives to help you invest wisely.
