

Piecework processing at the battery factory in cordoba argentina

Will Argentina start a lithium battery factory in Latin America?

(Image: Mariano Garcia /Alamy) Argentina will start operations at the first lithium battery cell factory in Latin America before the end of the year. The country aims to boost its position in the region's electric transport and energy storage markets, and go beyond simply producing the lithium that is critical to their growth.

What is the battery manufacturing process?

FAQs The battery manufacturing process is a complex sequence of steps transforming raw materials into functional, reliable energy storage units. This guide covers the entire process, from material selection to the final product's assembly and testing.

Which company has started a lithium commercialization plant in Argentina?

POSCO Holdings has started construction of a lithium commercialization plant in Argentina. POSCO Group is the first to produce lithium hydroxide for batteries in Argentina throughout the entire process from the acquisition of mining rights to exploration, construction and operation of a production plant.

Could a new lithium plant add value to Argentina's lithium industry?

A worker at a lithium plant in the Salinas Grandes salt flat in northern Argentina. The country's lithium production is rising, and a new battery plant will be one of the first facilities to process the metal domestically, with hopes of adding value to its industry. (Image: Mariano Garcia /Alamy)
