

Power Distribution for Emergency Command Storage Cabinets in Kuwait

The award-winning UPSs designed by Delta act as advanced power managers, ensuring the availability of an uninterrupted power supply to protect hardware and mission critical applications.

A Power Distribution Unit (PDU) is a device with multiple outlets designed to distribute power to computers, servers, network switches and other it devices in a rack.

Emergency and standby power systems are designed to provide an alternate source of power if the normal source of power, typically the electric utility service, should fail.

Smart Power Distribution Unit and UPS coordination ensures seamless, automated battery power switching during mains outages, protecting critical equipment.

Established back in year 2003, our current team encompasses over 350 highly skilled employees working in various projects to cater to the ever-growing demand for power.

Reliable rack power distribution via a single input with multiple output receptacles and distributes power from low amperage single phase circuits to higher-power 3-phase solutions.

EIGTC is targeted to meet the needs of various industries and serves various Kuwait & U.S. Government Departments along with other sustainable energy solutions.

From temporary event power to permanent hybrid installations, mobile energy storage containers are reshaping Kuwait's energy landscape. Want to discuss your specific needs?

We specialize in electric power containers, photovoltaic containers, mobile power stations, outdoor site energy systems, backup power, clean energy, photovoltaic projects, solar products, solar industry ...

Full Control Of The Power System for State of Kuwait Starting From the Power Generation Plants Through The Transmission Electrical Network With 400KV, 275KV, 132KV & 33KV Voltage Levels ...
