

# Precision electro mechanical

Electro-Mechanical Products, Inc. (EMP) is a leading manufacturer of precision machined components, thermal management solutions, and mechanical and electrical subassemblies used by technology ...

Frequently, mechanical assemblies require straightforward electrical integration of fans/blowers, switches, breakers, PDUs, I/O panels, cables and harnesses. We can deliver completely integrated ...

Our expertise ensures high-quality parts with tight tolerances, optimized for superior performance and long-term reliability in complex electro-mechanical systems. We produce ready-for ...

Turnkey electro-mechanical assembly solutions with in-house tooling, QA testing, and supply chain support. Built for precision, speed, and reliability.

Since 1972, Electro-Mechanical Products (EMP) has been a leader in the precision manufacturing industry. As a technology-driven company, EMP has invested heavily in state-of-the-art machining ...

We specialize in custom enclosures, panels, and mechanical assemblies, offering design assistance, high-speed production, and product testing. Learn about our advanced capabilities and commitment ...

Precision Electro-Mechanical is proud to be your one-stop-shop for electric motor repair, solutions, and sales. We're a full-service electric motor repair facility, specializing in rewinds...

With more than 10 years in existence, Precision Electromech specialises in the manufacture of high quality electro-mechanical components, mechanical enclosures, milling, sheet metal punching and ...

Integrating batch workpiece processing, mechanical processing, and manufacturing, we can undertake machine tool processing, structural parts, machining, high-precision, high difficulty, non-standard ...

From prototypes to production transfers, PEKO delivers the precision, integration, and support your system demands. Request a quote and let's start building today.
