

GoG's strong support and commitment aims at developing renewable resources and construction of additional transmission lines for export opportunities.

The new Law on Energy and Water Supply, approved by Georgia's parliament in 2019, was developed in co-operation with the Energy Community to transpose the requirements of key electricity and gas ...

Concerning solar energy, annual sunshine days range from 250 to 280 (1 900 to 2 200 hours) in most regions of the country, indicating considerable solar PV and solar thermal potential.

Explore India's new Solar Policy 2025--subsidies, net metering reforms, rooftop schemes, rural electrification, finance, and solar manufacturing incentives. [pdf]

tion in reducing grid electricity demand. Solar Photovoltaic (PV) panel with Battery Energy Storage System (BESS) is increasingly used to utilize solar energy for peak demand reduction and ...

Discover how solar energy and advanced storage solutions are transforming Georgia's energy landscape. Learn why businesses and communities in Tbilisi are adopting photovoltaic systems to ...

You know, Tbilisi's energy landscape is at a crossroads. With solar capacity growing 18% annually since 2022 and wind projects multiplying across Kakheti region, Georgia's capital faces a renewable ...

The higher energy generation during the summer months can be attributed to Tbilisi's position within the Northern Temperate Zone, which results in longer daylight hours and increased sunlight availability. ...

Summary: Discover how Tbilisi's sunny climate and supportive policies are driving solar energy adoption. This article explores the benefits, challenges, and practical insights for installing ...

In 2022, the share of renewable energy sources (wind and solar power plants) in the installed capacity of the energy system of Georgia remained at the same level, since solar and wind power plants were ...
