

Solar power version of the oil pump

This effort resulted in an innovative solar powered chemical injection pump for feeding a wide variety of chemicals into remote oil and gas wells where electrical power is unavailable. The Neptune Solar D ...

Thunderbird Solar offers innovative Solar-Powered Pump Jack systems to migrate marginal operator's power generation from costly utility power to a simple local direct drive solar system.

Discover Sun Pumper's complete line of solar-powered chemical injection pumps designed specifically for oil and gas applications. Our pumps eliminate the need for fuel gas, reduce maintenance costs, ...

Our solar electric pumps are reciprocating rod, positive-displacement piston pumps powered by industrial-quality compressed air. The motor is at surface grade, above the wellhead for easy ...

Conventional AC-powered pumps require large amounts of power to move large volumes of water in a short period of time. Solar pumps typically move a smaller volume of water over an ...

LORENTZ PS1800 Energy pumps are used to pump the fluid from each well. Each pump is powered by 4x 190 Wp solar modules. The solar modules run the pumps during daylight hours. There are no ...

The project's main objective was to utilize solar energy to operate a sucker rod pump at Farah-8 well in the Farah concession, Western Desert. A major gain of the project is to reduce the Diesel fuel ...

Pumps Plus offers a complete package including the pump, tank & stand, solar panel, battery, and switch. It's a "one stop shop" for your convenience. We partner with the best in the industry to ensure ...

The solar pumps are stainless steel built and come in water-filled and oil-filled variants. The pump controllers of the solar pumping systems have been specially developed to handle low ...

LORENTZ helical rotor (progressive cavity) pumps are designed to operate in challenging environments with no maintenance resulting in reliable performance and reduced operating costs. Our super ...
