

The Electricity Generating Authority of Thailand (EGAT) is pushing forward with the development of 14 new floating solar farm projects as part of its strategic efforts to increase renewable energy production.

Flagship solar energy projects in Thailand are becoming increasingly innovative: the state utility, EGAT, is tendering a 24 MW floating solar array at Ubol Ratana Dam, the first phase of a 2.7 GW hydro ...

In Thailand, Trinasolar has implemented a 24 MW AC floating solar plant at Ubonrat Dam in Khon Kaen, which has been operational since March 2024. This project is expected to cut CO2 emissions by ...

Explore the booming solar power system in Thailand, with insights on benefits, energy costs, government incentives, and installation tips.

The Electricity Generating Authority of Thailand (EGAT) has announced ambitious plans to expand the use of floating solar farms across the country's other reservoirs. The goal is to significantly ...

The Electricity Generating Authority of Thailand (Egat) wants to accelerate the development of 15 planned floating solar farm projects with a total capacity of 2,656 megawatts on the...

Listed below are the five largest upcoming Solar PV power plants by capacity in Thailand, according to GlobalData's power plants database. GlobalData uses proprietary data and analytics to provide ...

Thailand is making big moves toward a cleaner energy future. The government has quadrupled the annual quota for public solar power projects, from 100 MW to 400 MW in 2024, as part of a broader push to ...

The Electricity Generating Authority of Thailand (EGAT) is ...

This landmark project, developed by the Provincial Electricity Authority (PEA) for the State Railway of Thailand (SRT), marks a strategic scale-up of Thailand's distributed PV efforts.

The platform offers students the opportunity to study the operation of green electricity and sets a benchmark for the development of distributed photovoltaics in Thailand. Huawei has launched Smart PV Solutions ...
