

The latest distribution of UK power base stations

Real-time UK electricity generation dashboard showing current energy mix, historical trends, and interconnector flows. Track renewable energy, fossil fuels, and cross-border power exchange.

Live power cuts map For updates and information on any current power cut activity.

Most older coal-fired power stations in Great Britain closed in response. The government's introduction of a carbon price floor in 2013, and its subsequent increase in 2015, made ...

Real-time UK National Grid dashboard tracking electricity generation, carbon intensity, renewable energy mix, solar power, and interconnector flows. Live energy data updated every 30 seconds from ...

Data on the UK's electricity sector covering generation, fuel use, supply, consumption and power station capacity.

We're removing overhead power lines from our National Landscapes and Parks, restoring the British countryside to its beautiful best. [Click here to view how and where we are achieving this.](#)

Interactive map of the UK's operational electricity generating stations showing generation technology and installed capacity.

This dataset provides the location of primary, bulk supply (BSP) and grid supply (GSP) substations in the National Grid distribution network.

There are currently 8 Nuclear power stations in the UK. There is no central recording of Solar Generation. This figure is an estimated figure which comes from Sheffield University. This value is ...
