

# Uninterruptible power supply equipment for power distribution in Manchester UK

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply or UPS protects hardware such as computers, data centres, telecommunication equipment or other electrical equipment, where an unexpected power disturbance could cause serious business disruption or data loss.

What is a high-efficiency uninterruptible power supply?

We offer a wide range of high-efficiency Uninterruptible Power Supplies to provide critical power to a load when a mains outage occurs. Our UPS products provide scalable power up to 5.2MVA, for small to medium-sized computer environments, data centres, industrial automation processes and healthcare facilities.

Should you install an uninterruptible power supply?

Installing an uninterruptible power supply is an excellent way to protect your mission critical systems. However, it is no guarantee of continual power as UPS components and UPS batteries can fail if they are not properly maintained to a high standard.

Why should you choose a BPC energy uninterruptible power supply (UPS)?

Ensure continuous power supply with Uninterruptible Power Supplies (UPS) from BPC Energy - the reliable, scalable, and efficient solution for your critical power needs. We offer a wide range of high-efficiency Uninterruptible Power Supplies to provide critical power to a load when a mains outage occurs.
