

University Microgrid Summer Camp

The Microgrid Operator Certificate Program delivers practical, self-paced training for individuals seeking to manage and monitor microgrid systems in real-world conditions.

We're thrilled to invite professionals and enthusiasts in the energy sector to our intensive, two and a half day Microgrid Boot Camp. On April 10th, 11th, and 12th. This is a unique chance to...

Content includes an introduction to microgrid systems, high-level microgrid system sizing and feasibility analysis, hands-on microgrid operation and control, electrical design of distribution networks, and ...

Join us for a campus tour and learn what the School of Engineering and Applied Sciences at UB has to offer. Our world-class faculty is a diverse community of scholars dedicated to teaching and advising ...

Led by Director Mahmoud Kabalan, the university's Center for Microgrid Research is pioneering real-world, hands-on training for students and developing innovative solutions to...

This program offers a holistic microgrid approach, from basic terminology to research, design, and advanced topics in energy resilience systems. We offer three levels of training for your perusal, as ...

Join us for an intensive two and a half day (20 hours) Microgrid Boot Camp! This training offers a hands-on learning opportunity for microgrid design, integration, safety, operation, and maintenance at ...

This year's ACEP Summer Internship Program launched May 30 with the five-day Microgrid Boot Camp, laying the foundation for 17 undergraduates to begin their ten-week foray into ...

Step into the world of advanced energy systems with this dynamic, hands-on microgrid boot camp. In just 2.5 days, you'll gain essential knowledge and practical experience in designing, analyzing, and ...

The boot camp outfits participants with the knowledge and skills to prime them for online-based summer internship project work with remote and railbelt utilities, many of which have started ...
