What is Uruguay's energy strategy?

In 2005, Uruguay initiated a dramatic shift in its energy strategy, moving from petroleum-based electricity generation to renewable sources. In 2024, Uruguay generated 99 percent of its electricity from renewable sources using hydropower (42 percent), wind (28 percent), and biomass (26 percent).

What is the oil and gas industry like in Uruguay?

Uruguay's oil and gas sector is relatively underdeveloped, as the country does not produce hydrocarbons domestically and relies entirely on imports to meet its fossil fuel needs. State-owned ANCAP (Administración Nacional de Combustibles, Alcohol y Portland) oversees the sector, managing imports, refining, storage, and distribution of fuels.

How much energy does Uruguay produce in 2024?

According to preliminary 2024 data from Uruguay's Ministry of Industry, Energy and Mining (MIEM), national energy production reached 17,202 GWh, marking a rebound from the downward trend observed in 2023. Of the total production, 15,175.8 GWh was used to meet domestic demand, while 2,026.2 GWh was exported.

What is the main source of biomass in Uruguay?

Although forestry is the main source of biomass, Uruguay has other feedstock options, including byproducts from the beef industry and edible oil production. Investments in biomass generation increased considerably in 2013, reaching more than 400 MW of installed power generation, and has not increased since then.

Energy storage battery monitoring equipment manufacturing Leading companies, such as ABB, Schneider Electric, NXP Semiconductors, and Texas Instruments, are focusing heavily on R&D to ...

Uruguay Salto Grande Dam, constructed 40 years ago, is an 1890-MW power plant owned and operated by the Salto Grande Mixed Technical Commission (CTM), a binational ...

Overview Uruguay is globally recognized for its significant achievements in renewable energy development. As the country transitions to the second stage of decarbonization of its energy ...

Discover how lithium batteries are transforming Uruguay's energy infrastructure. As renewable energy adoption accelerates globally, Uruguay Peso City Power exemplifies how lithium-ion technology ...

The Pomega Energy Storage factory in the capital Ankara will launch at the end of the year with 350MWh of production capacity eventually rising to 1GWh by Q1 2025, with an interim ramp-up set ...

The U.S. has positioned large-scale energy storage technology as an important supporting technology to revitalize the economy, realize the New Deal for energy, and ensure national ... nd energy storage ...

Minister of Energy Sebastian Burduja signing 24 financing contracts for self-consumption solar and storage
