

# Users in remote areas external cabinet IP54

Together, IP54 enclosures ensure that internal components are safe from limited dust ingress and accidental splashing water, making them ideal for many industrial and commercial applications.

Discover IP54 enclosures for dustproof and splashproof protection. Ideal for industrial, telecom, automotive, and medical applications.

Overview of Standards Theory & Practice Protected Areas in Cabinet and Base The Correct Use of Base Plates In general, the enclosed protected space, which is defined as the space that encloses equipment providing defined protection against external influences and contact with live parts, is within the limits of the cabinet only (upper part). The base is a component and not an electrical component, so there are no defined requirements for a degree of protection.
