

# What is 2mm solar glass

Our solar glass with renowned &quot;Anti-soiling&quot; and &quot;Easy to clean&quot; coatings. High performance solar glass for Bifacial modules, Glass-glass modules, Floating PV modules, Rooftop PV, BIPV, Car ports, ...

The 2 mm solar glass is not only lighter than the current world standard of 3.2 mm, but also absorbs less solar energy while allowing higher irradiance to reach the solar cell.

2mm Low Iron Extra Tempered Solar Glass is an ultra-transparent subway glass with a light transmittance of over 91%. It has crystal clear and elegant characteristics.

The future of photovoltaic modules has already shifted to glass - glass modules in 2mm. Modules made with such ultra-clear glass, are far more efficient than traditional PV modules as there is less glass to ...

2MM Back glass with Drillings The solar glass in 2mm thickness can be used as the back panel of the double glazing pv module, can be with drillings, can be with white grille.

In the constant race to do more with less, solar panels in the utility-scale space have been getting more powerful but also larger, heavier and bulkier. To cut costs and weight of the two ...

Fully tempered 2 MM solar glass is 2 times stronger than heat-strengthened glass. The glass is safer and stronger than heat-strengthened glass (that leads to larger and sharper pieces when broken), ...

The Most Comprehensive Selected Top Class Chinese Glass Machines, Products and Services Resource

Low-iron solar glass, combined with nanometer anti-reflective coating technology is applied for solar modules. It increases solar transmittance by way of decreasing light reflectance, thus increasing the ...

The tempered glass qualifies as safety glass and has advantages for frameless photovoltaic modules like withstanding various environments without moisture penetration.
