Modern United States wind energy policy coincided with the beginning of modern wind industry of the United States, which began in the early 1980s with the arrival of utility-scale wind turbines in ...

The five-year extension for wind energy brings about the best possible long-term outcome that provides certainty, predictability and a responsible phase-down of a tax incentive for a renewable energy source.

Overview United States Energy Legislative History Wind Production Tax Credit (PTC) State Policy Tax Credits Renewable Portfolio Standards (RPS) Grant Programs Permitting and ordinances Modern United States wind energy policy coincided with the beginning of modern wind industry of the United States, which began in the early 1980s with the arrival of utility-scale wind turbines in California at the Altamont Pass wind farm. Since then, the industry has had to endure the financial uncertainties caused by a highly fluctuating tax incentive program. Because these early wind projects were fuelled by investment tax credits based on installation rather than performance, they were plagued with issues of ...

Arizona, Nevada and Mexico will be subject to substantial cuts from their Colorado River allocations for the third year in a row, the Bureau of Reclamation announced Friday.

Renewable energy, particularly wind and solar power, is receiving substantial subsidies in many countries worldwide. Unfortunately, wind and solar energy are unreliable and very expensive, ...

Discover how the US government subsidizes wind energy! Uncover key policies and the impact on renewable energy. Get all the insights you need today!

The proposed rule would reduce costs associated with such development by reducing acreage rents and fees for existing and new wind and solar projects on federal lands, as Congress ...

US President Donald Trump signed an executive order on Monday directing federal agencies to eliminate subsidies for wind and solar energy projects.

Outlined below are the primary federal incentives for developing and investing in wind power, resources for funding wind power, and opportunities to partner with DOE and other federal agencies on efforts ...

The Trump administration has further tightened the screws on the renewable energy industry, making it more difficult for new projects to claim tax credits that are set to phase out next year.

Thanks to these subsidies, including the longstanding Production Tax Credit (PTC) and Investment Tax Credit (ITC), and the extensions that these credits received in the Inflation Reduction ...
